## Options futures and other derivatives 10th edition hull solutions manual pdf

Get full access to Options, Futures, and Other Derivatives, 10th Edition and 60K+ other titles, with free 10-day trial of O'Reilly. There's also live online events, interactive content, certification prep materials, and more. For courses in business, economics, and financial engineering and mathematics. The definitive guide to derivatives markets, updated with contemporary examples and discussions. Known as "the bible" to business and economics professionals and a consistent best-seller, Options, Futures, and Other Derivatives gives readers a modern look at derivatives markets. By incorporating the industry's hottest topics, such as the securitization and credit crisis, author John C. Hull helps bridge the gap between theory and practice. The 10th Edition covers all of the latest regulations and trends, including the Black-Scholes-Merton formulas, overnight indexed swaps, and the valuation of commodity derivatives. Options, Futures, and Other Derivatives Contents In Brief Contents BUSINESS SNAPSHOTS TECHNICAL NOTES Preface About the Author Chapter 1 Introduction Chapter 2 Futures Markets and Central Counterparties Chapter 3 Hedging Strategies Using Futures Chapter 4 Interest Rates Chapter 5 Determination of Forward and Futures Prices Chapter 6 Interest Rate Futures Chapter 7 Swaps Chapter 8 Securitization and the Credit Crisis of 2007 Chapter 9 XVA's Chapter 10 Mechanics of Options Markets Chapter 11 Properties of Stock Options Chapter 12 Trading Strategies Involving Options Chapter 13 Binomial Trees Chapter 14 Wiener Processes and Itô's Lemma Chapter 15 The Black-Scholes-Merton Model Chapter 16 Employee Stock Options Chapter 17 Options on Stock Indices and Currencies Chapter 18 Futures Options and Black's Model Chapter 19 The Greek Letters Chapter 20 Volatility Smiles Chapter 21 Basic Numerical Procedures Chapter 22 Value at Risk and Expected Shortfall Chapter 23 Estimating Volatilities and Correlations Chapter 24 Credit Risk Chapter 25 Credit Derivatives Chapter 26 Exotic Options Chapter 27 More on Models and Numerical Procedures Chapter 28 Martingales and Measures Chapter 29 Interest Rate Derivatives: The Standard Market Models Chapter 30 Convexity, Timing, and Quanto Adjustments Chapter 31 Equilibrium Models of the Short Rate Chapter 32 No-Arbitrage Models of the Short Rate Chapter 33 HJM, LMM, and Multiple Zero Curves Chapter 34 Swaps Revisited Chapter 35 Energy and Commodity Derivatives Chapter 36 Real Options Chapter 37 Derivatives Mishaps and What We Can Learn from Them Glossary of Terms DerivaGem Software Major Exchanges Trading Futures and Options Table for  $N(x)$  When  $x \leq 0$ . Hull is a Professor of Derivatives and Risk Management at the Rotman School of Management at the University of Toronto. He is a respected researcher in the academic field of quantitative finance (see for example the Hull-White model) and is the author of two books on financial derivatives that are widely used texts for market practitioners: "Options, Futures, and Other Derivatives" and "Fundamentals of Futures and Options Markets". Hull is an editor of the Journal of Derivatives (since 1993), The Review of Derivatives Research (since 1993), the Journal of Derivatives Use, Trading & Regulation (since 1994), the Canadian Journal of Administrative Studies (since 1996), the Journal of Risk (since 1998), the Journal of Bond Trading and Management (since 2001), the Journal of Derivatives Accounting (since 2002) and the Journal of Credit Risk (since 2004). He studied Mathematics at Cambridge University (B.A. & M.A.), and holds an M.A. in Operational Research from Lancaster University and a Ph.D. in Finance from Cranfield University. In 1999, he was awarded the Financial Engineer of the Year Award, by the International Association of Financial Engineers. He has twin sons named Peter and David, and a wife named Michelle. Options Futures and Other Derivatives 10th Edition Hull SOLUTIONS MANUAL Full download at: CHAPTER 2 Futures Markets and Central Counterparties Practice Questions Problem 2.1. Distinguish between the terms open interest and trading volume. The open interest of a futures contract at a particular time is the total number of long positions outstanding. (Equivalently, it is the total number of short positions outstanding.) The trading volume during a certain period of time is the number of contracts traded during this period. Problem 2.2. What is the difference between a local and a futures commission merchant? A futures commission merchant trades on behalf of a client and charges a commission. A local trades on his or her own behalf. Problem 2.3. Suppose that you enter into a short futures contract to sell July silver for \$17.20 per ounce. The size of the contract is 5,000 ounces. The initial margin is \$4,000, and the maintenance margin is \$3,000. What change in the futures price will lead to a margin call? What happens if you do not meet the margin call? There will be a margin call when \$1,000 has been lost from the margin account. This will occur when the price of silver increases by 1,000/5,000 \$0.20. The price of silver must therefore rise to \$17.40 per ounce for there to be a margin call. If the margin call is not met, your broker closes out your position.
