use of cookies. × note, this version received a small patch update (v5.74.8198) to fix a settings bug. This patch update will be applied automatically unless automatic updates have been disabled. This version comes full of exciting improvements for all our users! Cleaning This version contains an essential update of session cleaning compatibility for
Chromium browsers like CCleaner Browser, Google Chrome, Edge, Brave, Opera, Opera GX, Avast Secure Browser and Vivaldi. Automatic updates to cCleaner Free. You can review your update preferences in the 'Options' menu - 'Updates'. If automatic updates are enabled, CCleaner runs in the
background and will check for them twice a day (if you run CCleaner, it will always check for an update first). Update preferences We've simplified the 'Options' menu - 'Updates' up to two settings: one to control automatic update first).
reminder when you run CCleaner. General Fixed a bug where text in warning message boxes has been highlighted. v5.74.8184 (09 Nov 2020) This version comes full of exciting improvements for all our users! Cleaning This version contains an essential update of session cleaning compatibility for Chromium browsers like CCleaner Browser, Google Chrome,
Edge, Brave, Opera, Opera, Opera GX, Avast Secure Browser and Vivaldi. Automatic updates to cCleaner will now be automatic updates are enabled, CCleaner runs in the background and will check for them twice a day (if you run
CCleaner, it will always check for an update first). Update preferences We've simplified the 'Options' menu - 'Updates' up to two settings: one to control automatic updates and one to control update notifications. CCleaner Professional If your license has expired, we will occasionally show you a reminder when you run CCleaner. General Fixed a bug where
text in warning message boxes has been highlighted. v5.73.8130 (26 Oct 2020) This release features a design update that makes it easy to see the status of your CCleaner Professional license in the app. We also make it easier to renew your license and reactivate it. License management The status of a CCleaner license is now clearer in UI Licenses or
expired can now be reactivated from the application Accessibility Improved Navigation of the screen reader in Cookies, Registry & Re
improved support for NVDA and JAWS screen readers so that visually impaired people using assistive technology can navigate quickly and intuitively through the application Updated color contrast across the user interface to make text, icons and buttons more readable for people with color vision impairment. We Fixed certain message boxes that have no
focus when appearing v5.71.7971 (14 Sep 2020) The update includes Cleaning improvements for cleaning Up Spotify and Firefox's internet cache now includes New boot cache! Cleaning added to Spotify to clear cached songs (but not your saved songs for offline use)
Privacy settings All users can now choose not to offer other products v5.70.7909 (06 Aug 2020) Important information for Firefox users If you use Firefox with a firefox account, we strongly recommend that you update cCleaner to version 5.70 before cleaning. This version of CCleaner fixes an issue that may cause extension settings to be lost in Firefox. The
update also includes performance improvements and improved support for Opera GX. Important fix for Firefox account Clearing clean smart support for Opera GX CCleaner now differentiates between opera processes and Fixed GX Opera a rare bug where
Health Check would not close all selected browsers General Fixed a performance issue where CCleaner could use more CPU than needed -DetectOS syntax correctly supports full numbers Build Windows on WinApp2 Errata Some unfinished improvements to CCleaner Privacy Settings have been included in this release by mistake. This will be rolled back
into a patch build and released when it is ready in a later version of CCleaner. Your existing privacy preferences have not been affected. v5.69.7865 (21 Jul 2020) This version of CCleaner brings a new cleanup to the Opera GX browser and bug fixes. Cleaning Added cleaning support for the game browser Opera GX General Minor UI fixed detectOS
in Chromium Health Check browsers Users can now provide a comment with their Rating Software Updater Software Updater displays a message when offline and a 'Try' button v5.67.7763 (28 May 2020) This version of CCleaner brings more cleanliness to Firefox, improvements in the delivery of our professional guided testing experience, and some stability
fixes for Windows 7 users. Cleaning Added optional cleaning of Firefox General crash reports We fixed a possible crash when CCleaner Professional, Business or Tech Editions is released on Windows 7 to professional testing to improve the delivery of your guided experience v5.66.7716 (May 1, 2020) In this version of CCleaner we have added full
cleaning support for brave and vivaldi browsers! Please note that we have fixed version 5.66.7705 to 5.66.7716 to fix a stability issue in the CCleaner Professional Trial stream. Cleaning The Brave browser can now be cleaned independently - the Vivaldi browser can now be cleaned independently Health Check We fixed an issue where 'Cookies' was also
deleting internet history and was incorrectly reporting a large number of trackers Internet history is now deleted through the 'History' Privacy category, which also includes download history and newly typed pro trial URLs Starting a Professional CCleaner test now gives you a guided experience for your resources v5.65.7632 (24 Mar 2020) In this version of
CCleaner we focused on adding new cleaning improvements and improving our new Health Check feature so that it is running without problems for all of you. Better cleaning smart cleaning browser smart cleaning now supports Health check chrome edge no longer
shows a connection error incorrectly (thanks nukecad!) Improved wording around connection errors to avoid unnecessary confusion Freezing the Fixed Health Check in some cases when CCleaner is released (thanks APMichael!) CCleaner Location is now translated to Bengali and Urdu Made improvements in various translations We fixed a bug where the
Estonian language option was showing Slovenian bug fixes & amp; minor changes Fixed a bug where erroneous data was being added to the .ini file (thanks larryg1516!) v5.64.7613 (03 Mar 2020) This version includes a new brand feature, plus many user-focused improvements and changes. In addition, we now support Microsoft's new Edge Chromium
browser. We really value feedback from our users, which is why we've created a new Idea Board. To help shape the future of CCleaner and send suggestions for what you'd like to see next, go to ideas.ccleaner.com join the conversation! Showing... 'Health Check' Health Check brings together ccleaner's most popular tools in a new easy-to-use interface to
help users easily maintain their PC In just a few clicks, users of any technical capacity can clean, update and disable unnecessary startup applications at once, to save space and increase speed, privacy and security Health Check replaces Easy Clean by following feedback from users on how it could be improved Edge Chromium & Camp; browser cleanup
improvements Added full support for Microsoft's new Edge Browser Fixed a bug in clearing the Google Earth cache If requested, CCleaner can now disable 'Preload' on the old edge (allows full cleaning) Easy-to-use improvements for installers for Avast products and CCleaner are now presented in a separate step in installer The offers for Avast
and CCleaner products are no longer verified standard goodbye to Windows XP & more information and assistance Other minor improvements Country embargo checks to reduce false positives We
fixed a UI interface bug in the scheduling interface Fixed a bug where the 'OK' button was missing from some dialog messages Removed Google Plus from the 'About' v5 screen.6 3.7540 (15 Oct 2019) General This version contains an important security update and some minor bug fixes and UI updates You can read more here: v5.62.7538 (October 3, 2019)
